## **Projects**

---

### **ZeChat by LugoTech**

- All your chats will be managed on a single platform, enabling us to collect and analyze data and statistics on conversation flows.
- Nuxt, Firebase, GitHub Actions
- Enhanced a new script with Node.js, Firebase and GitHub Actions to update the version, feature or minors changes of the app with a notification pop up for the user's interface increasing productivity and saving up to 10% of time.
- Integrated new features such a conversation sorting, responsive design, and more.

### **Shell | BHD – 2024 by LugoTech**

- Raffle for a trip to São Paulo, Brazil.
- Developed and implemented the register form validation of the website.
- Built with Nuxt, Vuetify and Firebase.

### **Kanban Task Management app | 2024**

- Frontendmentor.com guru challenge, developed with Next.js, TypeScript, Tailwind and Zod (for form validations) in the Frontend.
- Turso SQLite and Drizzle ORM for the Backend
- Jest and Playwright for Testing.
